He gets Rs. 5 for Radish per Kg, Rs. 4 for Muttar per Kg and Rs. 5 for Potato per Kg. The average yield ont build .81 is 1500 Kg of Radish per acre, 1800 Kg of Muttar per acre and 1200 Kg of Potato per acre. To produce each 100 Kg of Radish and Muttar and to produce togidue each 80 Kg of Potato, a sum of Rs. 12.50 has to be used for manure. Labour required for each acre to raise the crop is 6 man days for Radish and Potato each and 5 man days for Muttar. A total of 500 man days of labour at a rate of Rs. 40 per man days are available. Formulate this as a linear programming model to maximize the agriculturist's total profit.
